

AN ISO 9001:2008 CERTIFIED COMPANY

CREATE INNOVATIVE & EXCELLENT  
**DHAVAL STEEL FORGE**

ISO 9001:2008 CERTIFIED COMPANY

## About Us

Dhaival Steel Forge was founded to push the boundaries of the forged and bearing rings' ecosystem. With notable experience in the domain and a diversified business portfolio, Dhaival Steel Forge is one of the very few decent forged and bearing rings companies in the country.

Dhaival Steel Forge is positioned at the forefront of the forged and bearing rings industry that global firms are looking for in a connected world. All our products are built on the durable and innovative platform that makes them scalable, extendable, secure and able to customize/transform customer experience.

We have grown and diversified rapidly, setting benchmarks as a pioneer for others to follow. Our spirit of entrepreneurship has also been evident in the investments we have made in being the cutting-edge manufacturer, supplier and exporter of Ring rolled, Close-die, Open-die Forgings and in-house Machining Unit for Automotive Parts, Gear-Transmission, Bearing Race, Railway Rolled Ring, Flanges, Metal Gasket and General Engineering Applications from all type material like Alloy Steel & 31 MS 8620.

DSF is considered as one of the best manufacturing units in developing and manufacturing of Forged and Machined Parts. DSF is well-equipped with advance in-house technology along with various engineering facilities, with highest quality, functionality and cost effectiveness. We are an ISO 9001:2008 quality accredited company by TUV-SUD.

DSF believes in very strong Customer support mainly for Feasibility, Pricing, Production Quality, Delivery or any other issues. Senior Management is always available to visit customers at a short notice to discuss and resolve any issues related to above.

Dhaival Steel Forge is a 100% employee-owned manufacturer of custom rolled ring forgings. Operating with over 1000 Sq. Meter. of manufacturing. with state of art epoxy floor, adequate space for storage , well laid out inspection room/standards room & engineering office & contemporary administrative office.

We have supplied our products to Automotive, Bearing Races & General Engineering Parts Industries.

By ensuring the highest possible levels of quality products and efficiency in services and committing to continuous process and technology upgrades, Dhaival Steel Forge has defined its position as the market leader in the field of forged and bearing rings.

## Our Vision

- To create world class forged and bearing rings products and services that transform our reputed clients' and customer's using experience.

## Our Mission

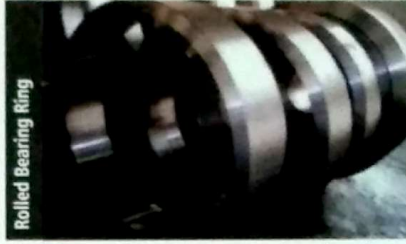

-To continue to preserving our entrepreneurial spirit and leveraging our wide customer/client base.

Company Chairman- Manoj Kanani

## Our Products

### Bearing Ring

### Capacity

- OD = Ø 100 mm to Ø 700 mm
- Wall Thickness 15 mm to 150 mm
- Height = 25 mm to 170 mm
- Weight In Kg. 5 Kg. to 60 Kg.
- In ferrous and alloy steel materials.

### Forge Ring

We supplied our products to Automotive, Bearing Races & General Engineering Parts Industries.

### Rolled Ring Forging

Our ability to optimize manufacturing and process capabilities, while offering the "insurance" back-up of 6 ring mills, allows us to deliver the highest quality ring to you in the least amount of time. Rings are made from Alloy Steel & 31 MS 8620. We have advanced capabilities for the manufacture of ring rolled forging with Spheroidize Annealing. Rectangular or profile rings as per customer's requirement.

### Power Press & Open Ring Rolling Forging

Controlled modern furnace is used to get good results for forging. We have power presses with capacity 50 to 500 tons used as per job requirement process. We in house have 5 Power Press & 2 Rolling machines equipped for the sizes 100 mm to 700 mm outer diameter and weight for 5 Kg. to 150 Kgs.

## Company USP

- Our business is built on the three strong pillars of Trust, Technique and Technology.
- Keenly study the requirements of each client.
- Delivering optimal solutions.
- We continuously strengthen our existing competencies and develop new ones.
- Why buy at DSF?
- We ensure customer satisfaction through the delivery of quality products.
- We make use of right technology to stay updated and ahead of ever-changing world.
- We work toward general social development.
- Customer obsession.
